

Contract Cleaners Seminar

IMPROVING EFFICIENCY, PRODUCTIVITY & PROFITABILITY

Running a cleaning company can be a complex and time consuming task. With so much information to manage about contracts, customers, employees, enquiries and much more, it is easy to understand why having an effective management system in place becomes vital.

Templa Computer Systems, in conjunction with **Millards Cleaning Services** of London are hosting a seminar specifically for the contract cleaning industry. The seminar will focus on how companies in this industry can benefit from one complete solution which covers all the key departments of the business: **sales, operations and finance**.

Some of the common problems the industry faces are:

- Multiple systems to do one job
- No true contract management
- Limited control of stores
- Paying wages incorrectly

Templa will demonstrate how **Templa-CMS** can solve the above and many more issues the industry face.

AGENDA

The seminar will be hosted in the afternoon and Millards will be there to share their experience of the system with everyone.

2:00pm : Registration & Welcome

2:15pm : **Millards Cleaning Services** & a **Overview** of the solution

Complete **contract management** from birth to death

Effective **stores management**

Fast & accurate **Billing**, Managing **wages**
